

**I WOULDN'T HAVE
GOT ANY OF MY
JOBS WITHOUT
MY PHD IN
QUANTITATIVE
MARINE SCIENCE.**

- Dr Sophie Bestley

PHD'S THAT TAKE YOU PLACES

MATHS TAKES YOU PLACES...  **FRANCE**

For Dr Sophie Bestley, a PhD in Quantitative Marine Science (QMS) on the migrations and feeding patterns of Southern Bluefin Tuna has led to highly sought - after jobs in Canada and France.

Now working on elephant seals, albatross, penguins and krill – identifying 'hotspots' or areas of high ecological significance in the Southern Ocean and Antarctic marine environments – Dr Bestley's work could be used to select marine reserves locations.

The CSIRO-UTAS PhD Program in Quantitative Marine Science (QMS) is offered through the University of Tasmania's specialist Institute for Marine and Antarctic Studies and CSIRO Marine and Atmospheric Research.
